SUMMARY

I'm a B.Tech 2nd-year student at Jamia Hamdard University, deeply passionate about using technology to solve real-world challenges. With a strong foundation in web development and Python programming, I enjoy building practical solutions that make an impact.

My interests also extend to blockchain technology and cybersecurity, where I'm constantly exploring new concepts and tools to strengthen my skills. I have participated in over 6 hackathons, working alongside talented teams to develop innovative projects within tight deadlines. These experiences have sharpened my technical abilities, teamwork, and problem-solving skills.

Additionally, I actively attend tech events, workshops, and community meetups, staying connected with the latest industry trends and expanding my professional network. I'm currently focused on advancing my full-stack development skills (MERN stack) while diving deeper into the evolving world of Web3 and cybersecurity.

BSV Academy

PROJECTS

ReliefChain

📅 03/2025   📍 Meerut Institute of Engg. & Tech

ReliefChain is a decentralized donation platform enabling users to contribute money or goods securely and transparently, ensuring aid reaches those in need directly, powered by blockchain technology for trust and efficiency.

Arctic Cart

📅 10/2024   📍 NeoX Grind Hackathon - RiseIn

ArcticCart is an innovative in-game NFT marketplace. Gamers can seamlessly buy and sell gun skins as NFTs, powered by the Neo X sidechain, ensuring secure, fast, and decentralized transactions for digital assets.

Retrieve It

📅 09/2024   📍 Netaji Subhas University of Tech

RetrieveIt is a smart lost-and-found platform that helps users report and search for lost items easily, using AI and location-based services to connect finders and owners efficiently.

DocPort

📅 08/2024   📍 IIIT Delhi

DocPort is a dynamic platform that aims to revolutionize resource sharing, collaboration, and progress tracking for students. The platform provides a centralized space where students can easily share documents, collaborate on projects, and monitor their progress with a easily
